## PROFILE SUMMARY

Results-driven MERN Full Stack Developer with hands-on experience in designing, developing, and deploying scalable, responsive, and user-centric web applications using **MongoDB, Express.js, React.js, and Node.js**. Possesses strong expertise in building modern front-end interfaces with **React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS**, while effectively supporting backend functionality through RESTful API development and server-side logic using Node.js and Express.js.

## CORE SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB
- **Tools & Libraries:** Git, GitHub, Postman, React Router, ReactToPrint, EmailJS, Recharts
- **Design & UX:** Canva (layout and mockups), Responsive Design, Accessibility
- **Other:** JWT Authentication, SPA Architecture, API Integration, Local Storage Management

## PROFESSIONAL EXPERIENCE

### MERN Full Stack Developer

March 2025 – Present

Satara Biochem, Satara, Maharashtra

- Developed and deployed a responsive corporate website using React.js and Tailwind CSS, improving product visibility and user engagement.
- Built interactive UI components such as hero sliders, product showcases, testimonial carousels, and enquiry forms.
- Implemented React Router for seamless single-page navigation.
- Optimized performance and cross-device responsiveness, improving mobile usability and reducing load time.

## PROJECTS

### Soil Test Generator

- Developed a full-stack soil analysis and automated report generation system using React.js, Node.js, and REST APIs.
- Reduced report generation time from **2 hours** to under **10 minutes**.
- Implemented charts using **Recharts for soil parameter visualization**.
- Designed a **clean, user-friendly dashboard** to display **test summaries and recommendations**.

### Task Management System

- Built an offline-ready **task management tool** using React, Node.js, and Tailwind CSS.
- Enabled small teams to **create, assign, and track tasks** efficiently without external SaaS tools.
- Implemented offline-first architecture using local storage with automatic data synchronization upon network reconnection.

## EDUCATION

- **Master's in Computer Science**, Karmaveer Bhaurao Patil University 2023 - 25  
**CGPA: 7.23**
- **Bachelor's in Computer Science**, Shivaji University 2020 - 23  
**CGPA: 8.76**
